

PRESENTATION EXAMPLES

What Great Ormond Street has learned from the Ferrari Formula 1 Pit Stop Team

Great Ormond Street recognized the transition of patients (children) from surgery to ICU was problematic – it took too long, was too hectic and too dangerous. By benchmarking performance against the Ferrari Pit Stop Team's hand-over steps, they significantly reduced transition time and dramatically increased patient safety.

ED-Management: How to optimize patient flow

Greater patient numbers in German Emergency Departments led to the introduction of new processes to increase patient safety and satisfaction. Frankfurt/Oder hospital's 5-step triage system proved so effective, that it won a prize in a national competition between 'Quality Hospitals'. This presentation explains the five steps and how they were implemented and integrated into an IT solution that benefited both patients and clinicians.

Patient focused process management: How to use industrial Planning tools to measure performance and improve quality of care

To improve quality of care, a Maltese Hospital's A&E Department applied two industrial tools – Quality Function Deployment (QFD) and Logical Framework Analysis (LFA) – to see which processes were needed, and which could be removed/altered. This presentation shares their results which included faster patient flow, expert triage and shorter waiting times.

How to hire and keep the best health care professionals

Demographic development has led to a growing deficit of physicians and nurses, at a time when demand for them is ever-increasing. The hospitals of the city of Cologne have developed "Demographic Risk Management" to cope with such problems.

New occupational groups in the health care services

The shortage of physicians has led to other occupational groups taking over certain duties. This presentation will explain how different healthcare sectors are succeeding in this important area. Content will include analysis and discussion about the importance of specialization, plus how new groups (like the Physician Assistant and the Technical-Surgical Assistant) are playing important roles.

European Forum for
Hospital Management

November 23rd–24th, 2011
London

INVITATION

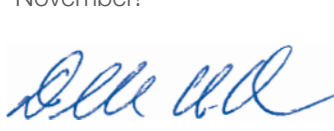

We would like to invite you to our unique European Forum bringing together some of Europe's recognized experts in the field of hospital management. We are all faced with new and constant challenges, and the better we adapt to change, learn from others and institutionalize best-practices, the better we can manage the future. This means our patients will be better off in the long run.

The agenda is focused on practical examples of how to get optimum value from people and processes in the hospital, including presentations introducing new concepts to

- free up more time for physicians
- improve cooperation with health care staff
- optimize patient flow between hospital departments
- enhance patient safety and quality of care
- contain costs through redefined procurement

The European Forum concept is designed to maximize the exchange of ideas. We have scheduled time for you to network with your peers, to discuss your best practices with each other, and learn from the visit to Great Ormond Street Hospital.

We are looking forward to welcoming you at the European Forum in London in November!

Dr. Uwe Preusker
Preusker Health Care OY
Finland

Prof. Dr. Dr. Wilfried von Eiff
Centre for Hospital
Management
University Münster,
Germany

Kathy Turner
Abbott Diagnostics Europe
Wiesbaden, Germany

WEDNESDAY, NOVEMBER 23rd

13.00–14.00 Arrival/Business Lunch

Chairman: Dr. Uwe K. Preusker, Preusker Health Care OY, Finland

14.00–14.15 Welcome

14.15–14.45 European Health Care Perspectives and Challenges – Reflections on the UK Health Care System
(speaker to be confirmed)

14.45–15.15 People and Processes – New Directions of Change Management
Prof. Wilfried von Eiff, Centre for Hospital Management, University Münster, Germany

15.15–15.45 Coffee Break

Session 1: People – How to fight the “War for Talent”

15.45–17.00 How to hire and keep the best health care professionals
Prof. Christian Schmidt, Kliniken der Stadt Köln, Germany

New occupational groups in the health care services
Taina Viiala, Laurea University for Applied Sciences, Finland

The Endo Nurse: How to overcome the physician shortage
Dr. Marvan Habiba, Leicester Royal Infirmary NHS Trust, UK

17.00–17.30 Best Practice Examples from the Audience, Discussion and Take Home Messages

17.30–18.00 What Great Ormond Street Hospital has learned from the Ferrari Formula 1 Pit Stop Team
Great Ormond Street Hospital, London, UK (speaker to be confirmed)

18.00–19.00 Break and transfer to the evening event

19.00–19.20 Dinner Speech: The role of Abbott in a changing hospital world
Kathy Turner, Abbott Diagnostics Europe

19.30 Dinner

THURSDAY, NOVEMBER 24th

**Session 2:
Processes – How to streamline the “Hospital of the Future”**
Chairman: Prof. Wilfried von Eiff, Centre for Hospital Management, University Münster, Germany

09.00–09.45 ED-Management: How to optimize patient flow
Dr. Petra Wilke, Rhön-Klinikum Frankfurt/Oder, Germany

Patient focused process management: How to use industrial planning tools to measure performance and improve quality of care
Dr. Sandra Buttigieg, University of Malta

09.45–10.15 Coffee Break

10.15–11.30 Does collaborative procurement work in the NHS and what should suppliers do? The new role of suppliers
Mario Varela, Barts and the London NHS Trust, UK

Redefining procurement: Cost containment and patient safety by putting electronic cabins in place
Rupert Robin, Avantec Ltd., UK

Hospital design: Framework for wellbeing and efficiency
(speaker to be confirmed)

11.30–12.15 Best Practice Examples from the Audience, Discussion and Take Home Messages

12.15–12.45 The Future of Integrated Diagnostics
Prof. Jörg Debatin, University Hospital Hamburg, Germany

12.45–13.00 Sum up
Uwe K. Preusker/Wilfried von Eiff

13.00-14.00 Business Lunch

Hospital Site Visit (optional): Great Ormond Street Hospital (GOSH)

14.00-16.00 Site-visit Program

PRELIMINARY AGENDA
